Hangar Door Operation

The doors on the Seaplane Terminal hangar and the DC-4 hangar open and close in response to setting frequencies on the Nav 2 radio as follows:

Set Nav 2 to 112.00 to open the Seaplane Hangar door.
Set Nav 2 to 113.00 to open the DC-4 Ops hangar door.

Wait 10-15 seconds and the doors will open.

Close Doors by setting Nav 2 to any other frequency.

There are small signs on each hangar identifying the frequency for operating the doors.
